1.2 RISK FACTORS

General Risks

1. **Market risk:** Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
2. **Liquidity risk:** Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
3. **Manager risk:** This risk refers to the day-to-day management of the Fund by the fund manager which will impact the performance of the Fund. For example, investment decisions undertaken by the fund manager pertaining to asset allocation and security selection which may not be in line with market movements, or non-conformance with regulations and internal policies and procedures, may adversely affect the performance of the Fund.
4. **Loan financing risk:** This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the loan.

The Manager does not encourage the practice of loan financing in the purchase of unit trust funds.

5. **Counterparty risk associated with OTC derivatives:** The use of OTC derivatives involve counterparty risk arising from counterparties' default or a decline in the counterparties' credit rating which may have adverse impact on the NAV of the Fund. In such circumstances, efforts will be taken to liquidate the derivative position.

Specific Risks

1. **Specific security risk:** Prices of a particular security may fluctuate in response to the circumstances affecting individual companies. As such, adverse price movements of a particular security invested by the Fund may adversely affect the Fund's NAV and unit price.
2. **Interest rate risk:** Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities and liquid assets. When interest rates rise, prices of fixed income securities generally decline and this may lower the market value of the Fund's investment in fixed income securities. The reverse applies when interest rates fall. The returns of the Fund's investments in liquid assets move in tandem with interest rates. A decline in interest rates will lower the returns of the Fund's investments in liquid assets. For example, when interest rates fall, deposit placements would be reinvested at lower interest rates and subsequently yield lower returns to the Fund.
3. **Credit risk:** Credit risk relates to the creditworthiness of the issuer of the securities or liquid assets which is dependent on the issuer's ability to make timely payments of interest or principal. In the event that the issuer of a security or liquid assets defaults in the payment of interest and/or principal, the value of the Fund may be adversely affected.
4. **Currency risk:** If the Fund invests in assets denominated in foreign currency, the Fund may be exposed to currency fluctuation risks. If the currencies in which the investments are denominated depreciate against the local currency, the Fund's NAV may be adversely affected and vice versa. To mitigate such risk, the Fund may undertake hedging strategies. However, the Fund would not benefit from any potential upside if currencies move in the opposite direction of the hedging strategy.
5. **Country risk:** Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the country in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of units to fall.
6. **Risk associated with investments in warrants:** The market price of warrants held by the Fund will depend on the current market price of the underlying security, the exercise price of the warrants and the time to expiration of the warrants. Such investments may experience time decay, and the erosion of value accelerates as the warrant approaches its expiry date. Any adverse movements in the market price of the warrants may impact the Fund's NAV and unit price.

Risk Management Strategies

Asset allocation, liquidity management and diversification strategies employed are central to the efforts to manage the risks posed to the Fund.

To mitigate risks arising from significant volatilities in times of adverse market movements, foreign currency exposure and foreign interest rate movements, the Fund may employ hedging strategies utilising derivatives such as futures contracts, foreign exchange forward contracts and options. Participation in these instruments are for hedging purposes only. Investments in warrants will be assessed on ongoing basis as it can potentially increase the volatility of the Fund's returns.

To manage credit risk, credit analysis is conducted and credit ratings of financial institutions is monitored on an ongoing basis. The Fund will focus on securities issued by companies with sound financial position whereby gearing ratio and interest cover ratio are within acceptable levels of the industry in which the issuer company operates.

In terms of liquidity risk management, prudent liquidity management such as cash flow and redemption monitoring is in place to ensure that the Fund maintains reasonable levels of liquidity to meet any redemption request.

The Manager in consultation with the trustee may suspend dealing in units due to exceptional circumstances (for example valuation difficulties due to illiquidity, or no price discovery which impact a significant portion of the funds' NAV), where there is good and sufficient reason to do so, considering the interest of unitholders.

1.5 VALUATION OF PERMITTED INVESTMENTS

The permitted investments of the Fund are fairly valued based on the following valuation methods:

Listed equities, warrants and options – valuation is based on market price of the respective exchanges. If no market price is available or valuation based on market price does not represent the fair value of investments, the securities will be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the trustee after appropriate technical consultation.

Unlisted equities – fair valuations which are based on methods that are acceptable to the Manager, verified by the auditor and approved by the trustee.

Listed and unlisted fixed income securities – for listed fixed income securities, the last traded prices quoted on a recognised exchange will be used. If no market price is available or valuation based on market price does not represent the fair value of the fixed income securities, the fixed income securities will be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the trustee after appropriate technical consultation.

In the case of unlisted fixed income securities denominated in RM, valuations are carried out on a daily basis using fair value prices quoted by a Bond Pricing Agency (BPA) registered with the SC. If the Manager is of the view that the price quoted by the BPA for a specific fixed income security differs from the 'market price' by more than 20 basis points, the Manager may use the 'market price' provided that the Manager adheres to the requirements stipulated by the SC. Market price for fixed income securities are derived from market quotations obtained from the panel of at least three active financial institutions that are governed by the Financial Services Act 2013 (FSA) and/or Islamic Financial Services Act 2013 (IFSA). Other unlisted fixed income securities which include foreign unlisted fixed income securities are valued daily based on fair value by reference to the average indicative yield quoted by at least three independent and reputable institutions.

Commercial papers – commercial papers are valued at purchase yields with interest accrued daily as they are generally held to maturity. The valuation of commercial papers will be monitored against market value on a daily basis and should the market value be lower by more than 5%, the commercial papers will be valued at the market value for that particular day.

Money market instruments – money market instruments which include negotiable instrument of deposits are valued at market yields based on the remaining days to maturity.

Deposits – the value of such investments shall be determined on a daily basis by reference to their principal value and the accrued interest thereon for the relevant period.

Units in other collective investment schemes – for unlisted collective investment schemes, valuation is based on last published repurchase price. For listed collective investment schemes, valuation is based on market price of the respective exchanges. If no market price is available or valuation based on market price does not represent the fair value of investments, the units will be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the trustee after appropriate technical consultation.

Foreign exchange forward contracts – all foreign exchange forward contracts are marked-to-market daily and valued at fair value using forward rate of the remaining tenure to maturity.

Futures contracts – all futures contracts are marked-to-market at the end of each trading day. Any gains or losses are immediately reflected upon marking to market.

Suspended securities – will be valued at their suspended price unless there is conclusive evidence to indicate that the value of such stocks have gone below the suspended price, whereupon their value will be ascertained in a manner as agreed upon by the Manager and trustee.

All foreign securities and assets are converted into RM based on the bid exchange rate quoted by Thomson Reuters/Bloomberg at United Kingdom time 4:00 p.m. the same day.

3.1 DETERMINATION OF PRICES

Valuation Point

Valuation of PeWTGBF will be conducted after the close of business of Bursa Securities for the relevant day. As certain foreign markets in which the Fund may invest in have yet to close due to the different time zones of these countries, the valuation point may be extended to 9:00 a.m. (or any other such time as may be permitted by the relevant authorities from time to time) on the following day in which the Manager is open for business. As a result of having a valuation point later than 5:00 p.m., the daily prices of the Fund will not be published on the next Business Day but instead will be published the next following Business Day (i.e. the prices will be 2 days old).

NAV per Unit

The NAV per unit is obtained by dividing the NAV of the Fund by the number of units in issue.

Illustration:

Total NAV (RM) 352,625,000	÷	UIC (units) 1,410,500,000	=	NAV per unit (RM) 0.25000000
--------------------------------------	---	-------------------------------------	---	--

Single Pricing

Purchase and redemption of units are quoted and transacted at a single price, i.e. at the NAV per unit of the Fund. Sales charge and redemption charge (if any) are computed and charged separately, and are not incorporated in the quoted prices of the Fund.

Forward Pricing

Both the purchase and redemption transactions are traded at prices *next determined*. A request issued by you to purchase or redeem units of the Fund will be carried out at a price as at *the next valuation point after the application is received and accepted by the Manager*.

Investments banked in over the counter through Public Bank branches on any Business Day will be processed based on the price determined for the same Business Day.

Payment received before or at 4:00 p.m.

Processed based on the price determined for the same Business Day.

Payment received after 4:00 p.m.

Processed based on the price determined for the next Business Day.

Any investment and transaction requests made on a non-Business Day will be treated as investments or transaction requests made on the following Business Day.

Incorrect Pricing

In the event of any incorrect pricing of units of the Fund, the Manager shall take immediate remedial action where that incorrect pricing –

- is equal or more than 0.5% of the NAV per unit; and
- results in a sum total of RM10.00 or more to be reimbursed to the affected unitholder for each purchase or redemption transaction.

Subject to any regulatory requirements, the Manager shall have the right to amend, vary or revise the abovesaid limits or threshold from time to time.

Dear Sirs

Re: Taxation of the Fund and Unit Holders

This letter has been prepared for inclusion in this First Prospectus of Public e-Worldwide Thematic Growth Balanced Fund in connection with the offer of units in the Public e-Worldwide Thematic Growth Balanced Fund ("the Fund").

Taxation of the Fund

Income Tax

The Fund is a unit trust for Malaysian tax purposes. The taxation of the Fund is therefore governed principally by Sections 61 and 63B of the Income Tax Act, 1967 ("the Act").

Subject to certain exemptions, the income of the Fund in respect of investment income derived from or accruing in Malaysia is liable to income tax at the rate of 24% effective Year of Assessment ("YA") 2016.

Gains from the realisation of investments by the Fund will not be subject to income tax in Malaysia. However, such gains may be subject to tax in the country from which it is derived.

Interest income earned by the Fund from the following are exempt from tax: -

- any savings certificates issued by the Government; or
- securities or bonds issued or guaranteed by the Government; or
- debentures or sukuk, other than convertible loan stock, approved or authorized by, or lodged with, the Securities Commission; or
- Bon Simpanan Malaysia issued by the Central Bank of Malaysia; or
- a bank or financial institution licensed under the Financial Services Act 2013 or Islamic Financial Services Act 2013^{N1}; or
- any development financial institution regulated under the Development Financial Institutions Act 2002^{N1}; or
- sukuk originating from Malaysia, other than convertible loan stocks, issued in any currency other than Ringgit and approved or authorized by, or lodged with, the Securities Commission, or approved by the Labuan Financial Services Authority^{N2}.

The Fund may receive dividends, interest and other income from investments outside Malaysia. Income derived from sources outside Malaysia and received in Malaysia by a resident unit trust is exempt from Malaysian income tax. However, such income may be subject to tax in the country from which it is derived.

Discounts earned by the Fund from the following are also exempt from tax: -

- securities or bonds issued or guaranteed by the Government; or
- debentures or sukuk, other than convertible loan stock, approved or authorized by, or lodged with, the Securities Commission; or
- Bon Simpanan Malaysia issued by the Central Bank of Malaysia.

Single tier Malaysian dividends received by the Fund are exempt from tax and expenses in relation to such dividend income are disregarded.

^{N1} Effective from 1 January 2019, the exemption shall not apply to the interest paid or credited to a unit trust that is a wholesale fund which is a money market fund.

^{N2} Effective from YA 2017, income tax exemption shall not apply to interest paid or credited to a company in the same group, licensed banks and prescribed development financial institutions.

Tax deductions in respect of the Fund's expenses such as manager's remuneration, expenses on maintenance of register of unit holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage ("permitted expenses") are allowed based on a prescribed formula subject to a minimum of 10% and a maximum of 25% of the total permitted expenses.

Real Property Gains Tax ("RPGT")

Gains on disposal of investments by the Fund will not be subject to income tax in Malaysia. However, such gains may be subject to RPGT in Malaysia, if the gains are derived from sale of Malaysian real properties and shares in Malaysian real property companies (as defined). Such gains would be subject to RPGT at the applicable rate depending on the holding period of the chargeable assets.

Sales Tax and Service Tax

The Goods and Services Tax ("GST") has been replaced by Sales Tax and Service Tax effective from 1 September 2018.

Under the Sales Tax Act 2018, Service Tax Act 2018 and subsidiary legislation, the sales tax rate for taxable goods is 5% or 10% while the service tax rate for taxable services is generally 6%. There are certain goods which are exempted from sales tax.

The issue, holding or redemption of any unit under a trust fund does not fall within the list of taxable services under the First Schedule of the Service Tax Regulations 2018 and hence, is not subject to service tax. The investment activities of the Fund such as buying and selling of securities and deposits in financial institutions are also not subject to service tax. As such, if the Fund is only deriving income from such activities, the Fund is not liable to be registered for service tax.

However, certain expenses incurred by the Fund such as legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007. The service tax incurred by the Fund is a cost to the Fund and is not recoverable, unlike the GST input tax which is claimable under the GST regime.

Based on the Finance Act 2018, the imposition and scope of service tax has been widened to include any imported taxable service. This is effective from 1 January 2019.

Taxation of Unit Holders

Income Tax

Unit holders are taxed on an amount equivalent to their share of the total taxable income of the Fund, to the extent that this is distributed to them. The income distribution from the Fund may carry with it applicable tax credits proportionate to each unit holder's share of the total taxable income in respect of the tax paid by the Fund. Unit holders will be entitled to utilise the tax credit as a set off against the tax payable by them. Any excess over their tax liability will be refunded to the unit holders. No other withholding tax will be imposed on the income distribution of the Fund.

Corporate unit holders, resident or non-resident in Malaysia, would be taxed at the corporate tax rate of 24% (effective from YA 2016), on distributions of income from the Fund to the extent of an amount equivalent to their share of the total taxable income of the Fund. Corporate unit holders in Malaysia with paid-up capital in the form of ordinary shares of RM2.5 million and below will be subject to a tax rate of 17% on chargeable income of up to RM600,000, effective from YA 2020. This concessionary income tax rate is given only to corporate unit holders having gross business income for the relevant year of assessment of not more than RM50 million, in addition to the share capital requirement. For chargeable income in excess of RM600,000, the tax rate of 24% is still applicable.

However, the said tax rate of 17% on chargeable income of up to RM600,000 would not apply if more than 50% of the paid up capital in respect of ordinary shares of that corporate unit holder is directly or indirectly owned by a related company which has a paid up capital exceeding RM2.5 million in respect of ordinary shares, or vice versa, or more than 50% of the paid up capital in respect of ordinary shares of both companies are directly or indirectly owned by another company.

Individuals and other non-corporate unit holders who are resident in Malaysia will be subject to income tax at scale rates. The scale tax rates range from 0% to 30% with effect from YA 2020.

Individuals and other non-corporate unit holders who are not resident in Malaysia, for tax purposes, are subject to Malaysian income tax at the rate of 30% with effect from YA 2020. Non-resident unit holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaties with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdiction.

The distribution of single-tier Malaysian dividends and tax exempt income by the Fund will not be subject to tax in the hands of the unit holders in Malaysia. Distribution of foreign income will also be exempt in the hands of the unit holders.

Units split by the Fund will be exempt from tax in Malaysia in the hands of the unit holders.

Any gains realised by the unit holders (other than financial institutions, insurance companies and those dealing in securities) from the transfer or redemption of the units are generally treated as capital gains which are not subject to income tax in Malaysia. However, certain unit holders may be subject to income tax in Malaysia on such gains, due to specific circumstances of the unit holders.

Sales Tax and Service Tax

Only taxable services listed in the First Schedule of the Service Tax Regulations 2018 are subject to service tax, which exclude investment income or gains.

However, legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007.

Based on the Finance Act 2018, the imposition and scope of service tax has been widened to include any imported taxable service. This is effective from 1 January 2019.

The tax position is based on our understanding and interpretation of the Malaysian tax legislations and proposals as they stand at present. All prospective investors should not treat the contents of this letter as advice relating to taxation matters and are advised to consult their own professional advisers concerning their respective investments.

Yours faithfully

Ong Guan Heng
