1.2 RISK FACTORS

General Risks

1. **Market risk:** Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.
2. **Liquidity risk:** Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
3. **Manager risk:** This risk refers to the day-to-day management of the Fund by the fund manager which will impact the performance of the Fund. For example, investment decisions undertaken by the fund manager pertaining to asset allocation and stock selection which may not be in line with market movements, or non-conformance with regulations and internal policies and procedures, may adversely affect the performance of the Fund.
4. **Loan financing risk:** This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at a lower NAV per unit as compared to the NAV per unit at the point of purchase towards settling the loan.

The Manager does not encourage the practice of loan financing in the purchase of unit trust funds.

5. **Counterparty risk associated with OTC derivatives:** The use of OTC derivatives involve counterparty risk arising from counterparties' default or a decline in the counterparties' credit rating which may have adverse impact on the NAV of the Fund. In such circumstances, efforts will be taken to liquidate the derivative position.

Specific Risks

1. **Specific security risk:** Prices of a particular security may fluctuate in response to the circumstances affecting individual companies. As such, adverse price movements of a particular security invested by the Fund may adversely affect the Fund's NAV and unit price.
2. **Interest rate risk:** Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities and liquid assets. When interest rates rise, fixed income securities prices generally decline and this may lower the market value of the Fund's investment in fixed income securities. The reverse applies when interest rates fall. The returns of the Fund's investments in liquid assets move in tandem with interest rates. A decline in interest rates will lower the returns of the Fund's investments in liquid assets. For example, when interest rates fall, deposit placements would be reinvested at lower interest rates and subsequently yield lower returns to the Fund.
3. **Credit risk:** Credit risk relates to the creditworthiness of the issuer of the securities or liquid assets which is dependent on the issuer's ability to make timely payments of interest and/or principal. In the event that the issuer of a security or liquid assets defaults in the payment of interest and/or principal, the value of the Fund may be adversely affected.
4. **Currency risk:** If the Fund invests in assets denominated in foreign currency, the Fund may be exposed to currency fluctuation risks. If the currencies in which the investments are denominated depreciate against the local currency, the Fund's NAV may be adversely affected and vice versa. To mitigate such risk, the Fund may undertake hedging strategies. However, the Fund would not benefit from any potential upside if currencies move in the opposite direction of the hedging strategy.
5. **Country risk:** Investments of the Fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the country in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of units to fall.
6. **Risk associated with investments in warrants:** The market price of warrants held by the Fund will depend on the current market price of the underlying security, the exercise price of the warrants and the time to expiration of the warrants. Such investments may experience time decay, and the erosion of value accelerates as the warrant approaches its expiry date. Any adverse movements in the market price of the warrants may impact the Fund's NAV and unit price.

Risk Management Strategies

Asset allocation, liquidity management and diversification strategies employed are central to the efforts to manage the risks posed to the Fund.

To mitigate risks arising from foreign currency exposure, the Fund may employ hedging strategies utilising foreign exchange forward contracts. Participation in foreign exchange forward contracts is for hedging purposes only. Investments in warrants will be assessed on ongoing basis as it can potentially increase the volatility of the Fund's returns.

To manage credit risk, credit analysis is conducted and credit ratings of financial institutions is monitored on an ongoing basis. The Fund will focus on securities issued by companies with sound financial position whereby gearing ratio and interest cover ratio are within acceptable levels of the industry in which the issuer company operates.

1.3 PERMITTED INVESTMENTS

The Manager should, within a reasonable period of not more than 3 months from the date of the breach, take all necessary steps and actions to rectify the breach.

Such limits and restrictions, however, do not apply to securities that are issued or guaranteed by the Government or Bank Negara Malaysia.

1.5 VALUATION OF PERMITTED INVESTMENTS

The permitted investments of the Fund are fairly valued based on the following valuation methods:

Listed equities and warrants – valuation is based on market price of the respective exchanges. If no market price is available or valuation based on market price does not represent the fair value of investments, the securities will be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the trustee after appropriate technical consultation.

Listed and unlisted fixed income securities – for listed fixed income securities, the last traded prices quoted on a recognised exchange will be used. If no market price is available or valuation based on market price does not represent the fair value of the fixed income securities, the fixed income securities will be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the trustee after appropriate technical consultation.

In the case of unlisted fixed income securities denominated in RM, valuations are carried out on a daily basis using fair value prices quoted by a Bond Pricing Agency (BPA) registered with the SC. If the Manager is of the view that the price quoted by the BPA for a specific fixed income security differs from the 'market price' by more than 20 basis points, the Manager may use the 'market price' provided that the Manager adheres to the requirements stipulated by the SC. Market price for fixed income securities are derived from market quotations obtained from the panel of at least three active financial institutions that are governed by the Financial Services Act 2013 (FSA) and/or Islamic Financial Services Act 2013 (IFSA). Other unlisted fixed income securities which include foreign unlisted fixed income securities are valued daily based on fair value by reference to the average indicative yield quoted by at least three independent and established institutions.

Commercial papers – commercial papers are valued at purchase yields with interest accrued daily as they are generally held to maturity. The valuation of commercial papers will be monitored against market value on a daily basis and should the market value be lower by more than 5%, the commercial papers will be valued at the market value for that particular day.

Money market instruments – money market instruments which include negotiable instrument of deposits are valued at market yields based on the remaining days to maturity.

Deposits – the value of such investments shall be determined on a daily basis by reference to their nominal values and the accrued interest thereon for the relevant period.

Dear Sirs

Re: Taxation of the Fund and Unit Holders

This letter has been prepared for inclusion in this First Prospectus of PB Greater China A-Shares Fund in connection with the offer of units in the PB Greater China A-Shares Fund ("the Fund").

Taxation of the Fund

Income Tax

The Fund is a unit trust for Malaysian tax purposes. The taxation of the Fund is therefore governed principally by Sections 61 and 63B of the Income Tax Act, 1967 ("the Act").

Subject to certain exemptions, the income of the Fund in respect of investment income derived from or accruing in Malaysia is liable to income tax at the rate of 24% effective Year of Assessment ("YA") 2016.

Gains from the realisation of investments by the Fund will not be subject to income tax in Malaysia. However, such gains may be subject to tax in the country from which it is derived.

Interest income earned by the Fund from the following are exempt from tax: -

- any savings certificates issued by the Government; or
- securities or bonds issued or guaranteed by the Government; or
- debentures or sukuk, other than convertible loan stock, approved or authorized by, or lodged with, the Securities Commission; or
- Bon Simpanan Malaysia issued by the Central Bank of Malaysia; or
- a bank or financial institution licensed under the Financial Services Act 2013 or Islamic Financial Services Act 2013^{N1}; or
- any development financial institution regulated under the Development Financial Institutions Act 2002^{N1}; or
- sukuk originating from Malaysia, other than convertible loan stocks, issued in any currency other than Ringgit and approved or authorized by, or lodged with, the Securities Commission, or approved by the Labuan Financial Services Authority^{N2}.

The Fund may receive dividends, interest and other income from investments outside Malaysia. Income derived from sources outside Malaysia and received in Malaysia by a resident unit trust is exempt from Malaysian income tax. However, such income may be subject to tax in the country from which it is derived.

Discounts earned by the Fund from the following are also exempt from tax: -

- securities or bonds issued or guaranteed by the Government; or
- debentures or sukuk, other than convertible loan stock, approved or authorized by, or lodged with, the Securities Commission; or
- Bon Simpanan Malaysia issued by the Central Bank of Malaysia.

Single tier Malaysian dividends received by the Fund are exempt from tax and expenses in relation to such dividend income are disregarded.

^{N1} Effective from 1 January 2019, the exemption shall not apply to the interest paid or credited to a unit trust that is a wholesale fund which is a money market fund.

^{N2} Effective from YA 2017, income tax exemption shall not apply to interest paid or credited to a company in the same group, licensed banks and prescribed development financial institutions.

Tax deductions in respect of the Fund's expenses such as manager's remuneration, expenses on maintenance of register of unit holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage ("permitted expenses") are allowed based on a prescribed formula subject to a minimum of 10% and a maximum of 25% of the total permitted expenses.

Real Property Gains Tax ("RPGT")

Gains on disposal of investments by the Fund will not be subject to income tax in Malaysia. However, such gains may be subject to RPGT in Malaysia, if the gains are derived from sale of Malaysian real properties and shares in Malaysian real property companies (as defined). Such gains would be subject to RPGT at the applicable rate depending on the holding period of the chargeable assets.

Sales Tax and Service Tax

The Goods and Services Tax ("GST") is replaced by Sales Tax and Service Tax effective from 1 September 2018.

Under the Sales Tax Act 2018, Service Tax Act 2018 and subsidiary legislation, the sales tax rate for taxable goods is 5% or 10% while the service tax rate for taxable services is generally 6%. There are certain goods which are exempted from sales tax.

The issue, holding or redemption of any unit under a trust fund does not fall within the list of taxable services under the First Schedule of the Service Tax Regulations 2018 and hence, is not subject to service tax. The investment activities of the Fund such as buying and selling of securities and deposits in financial institutions are also not subject to service tax. As such, if the Fund is only deriving income from such activities, the Fund is not liable to be registered for service tax.

However, certain expenses incurred by the Fund such as legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007. The service tax incurred by the Fund is a cost to the Fund and is not recoverable, unlike the GST input tax which is claimable under the GST regime.

Based on the Finance Act 2018 which has been gazetted on 27 December 2018 the imposition and scope of service tax is now widened to include any imported taxable service. This is effective from 1 January 2019.

Taxation of Unit Holders

Income Tax

Unit holders are taxed on an amount equivalent to their share of the total taxable income of the Fund, to the extent that this is distributed to them. The income distribution from the Fund may carry with it applicable tax credits proportionate to each unit holder's share of the total taxable income in respect of the tax paid by the Fund. Unit holders will be entitled to utilise the tax credit as a set off against the tax payable by them. Any excess over their tax liability will be refunded to the unit holders. No other withholding tax will be imposed on the income distribution of the Fund.

Currently, corporate unit holders, resident or non-resident in Malaysia, would be taxed at the corporate tax rate of 24% (effective from YA 2016), on distributions of income from the Fund to the extent of an amount equivalent to their share of the total taxable income of the Fund. Corporate unit holders in Malaysia with paid-up capital in the form of ordinary shares of RM2.5 million and below will be subject to a tax rate of 17% (effective from YA 2019) on chargeable income of up to RM500,000. For chargeable income in excess of RM500,000, the tax rate of 24% is still applicable.

However, the said tax rate of 17% on chargeable income of up to RM500,000 would not apply if more than 50% of the paid up capital in respect of ordinary shares of that corporate unit holder is directly or indirectly owned by a related company which has a paid up capital exceeding RM2.5 million in respect of ordinary shares, or vice versa, or more than 50% of the paid up capital in respect of ordinary shares of both companies are directly or indirectly owned by another company.

Based on the Finance Bill 2019, the chargeable income which is subject to the concessionary income tax rate of 17% will be increased from RM500,000 to RM600,000 and it is given only to corporate unit holders having gross business income for the relevant year of assessment of not more than RM50 million, in addition to the share capital requirement. The amendment is effective from YA 2020.

Currently, individuals and other non-corporate unit holders who are resident in Malaysia will be subject to income tax at scale rates. The scale tax rates range from 0% to 28% with effect from YA 2016. Based on the Finance Bill 2019, a chargeable income band exceeding RM2,000,000 has been introduced at a tax rate of 30%. The amendment is effective from YA 2020.

Individuals and other non-corporate unit holders who are not resident in Malaysia, for tax purposes, are subject to Malaysian income tax at the rate of 28% with effect from YA 2016. The income tax rate will be increased from 28% to 30% based on the Finance Bill 2019, effective from YA 2020. Non-resident unit holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaties with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdiction.

The distribution of single-tier Malaysian dividends and tax exempt income by the Fund will not be subject to tax in the hands of the unit holders in Malaysia. Distribution of foreign income will also be exempt in the hands of the unit holders.

Units split by the Fund will be exempt from tax in Malaysia in the hands of the unit holders.

Any gains realised by the unit holders (other than financial institutions, insurance companies and those dealing in securities) from the transfer or redemption of the units are generally treated as capital gains which are not subject to income tax in Malaysia. However, certain unit holders may be subject to income tax in Malaysia on such gains, due to specific circumstances of the unit holders.

Sales Tax and Service Tax

Only taxable services listed in the First Schedule of the Service Tax Regulations 2018 are subject to service tax, which exclude investment income or gains.

However, legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007.

Based on the Finance Act 2018 which has been gazetted on 27 December 2018 the imposition and scope of service tax is now widened to include any imported taxable service. This is effective from 1 January 2019.

The tax position is based on our understanding and interpretation of the Malaysian tax legislations and proposals as they stand at present. All prospective investors should not treat the contents of this letter as advice relating to taxation matters and are advised to consult their own professional advisers concerning their respective investments.

Yours faithfully
