## Designed with multi-layered security features for your peace of mind.

### **User ID and Password**

A unique ID and strong password can help safeguard your account from being hacked.

### **Personal Login Phrase (PLP)**

A PLP helps to verify that you are logging into the correct and trusted platform.

### **Public Mutual SecureSign**

Investment transactions and service requests initiated on PMO, like switching funds, making redemptions, adding a joint holder, and managing bank account information, require second-factor authentication via SecureSign on PMO PLUS.

### **Secure Sockets Layer (SSL) / Transport Layer Security (TLS)**

SSL/ TLS allows sensitive information such as your login credentials and personal data to be transmitted securely as the data is encrypted.

### **Personal Authentication Code (PAC)**

A PAC will be generated by the system and delivered to your registered mobile phone number via Short Message Service (SMS) when you perform certain transaction requests.

### **Session Management**

You will automatically be logged out of your account if there has not been any activity for a certain period of time. This helps to reduce the risk of data breaches while your account is left idle.

### **Post-transaction Notification**

Notifications will be sent to your registered e-mail address and/or the notification module on PMO PLUS to keep you informed of the transactions which have been processed.

### **Kill Switch**

Disables your PMO account immediately if you notice any unauthorised transactions or suspect that your account may have been compromised.

Take the first step and unlock a better financial future.
